# Generator Enclosure

COMPONENT OPTIONS

## **LOCKABLE SQ3TS® GENERATOR ENCLOSURE**

The Generator Enclosure add-on provides backup power for Horizon Portable Signal Systems operating in areas with limited solar collection capabilities. The unit features a lockdown coupler which allows for convenient storage on the rear of the Horizon Signal SQ3TS System, keeping the unit out of sight from passing motorists. The enclosure is designed to be used with a Honda EU2000i generator, which features quiet operation and low fuel consumption. The EU2000i's 1.1 gallon fuel tank provides up to 10 hours of run time, depending on battery levels in the SQ3TS System. The Generator Enclosure component is available individually or as a package including the Honda EU2000i generator.
