

Manual Operation Options

COMPONENT OPTIONS

MICRO TERMINAL MANUAL OPERATION

The Horizon Signal Micro Terminal is standard with all Horizon Signal Systems.

- The micro terminal can be connected to any controller within the signal setup via a quick plug attachment.
- The micro terminal provides system information via the back lit LED screen.
- The micro terminal extension can be used to allow the operator to control the signal system from a safe convenient location.

WIRELESS HAND HELD REMOTE

The wireless hand held remote is an option available with all Horizon Signal Systems.

- The operation mode can be changed from the automatic to the manual mode and back to the automatic mode via the wireless handheld remote.
- The wireless handheld remote provides a confirmation that a command has been accepted.
- The rugged wireless handheld remote has a ½ mile range from the Master Remote Control Module

CABLED TOGGLE CONTROL SWITCH

The Cabled Toggle Control Switch is ideal for two phase work zone projects.

- The cabled toggle control switch can be connected to any controller within the signal setup via a quick plug attachment.
- The cabled toggle control switch is available in lengths that assure the operator can control the signal system from a safe convenient location.
- Allows user to request green times without possibility of conflict.
