

# Remote access options

## Work zone video monitoring

### Real-time views of your work zone

The Horizon Signal PTZ Camera is the most advanced PTS Remote Video Monitoring system available today. Get a live look at traffic with resolutions up to full 1080 HD, and up to 60 frames per second — and take control with full 360-degree rotation and an impressive 384x Zoom so you don't miss a single detail of your work zone. Custom camera options are available to meet your specific project requirements.

#### Product features

- Up to 1920x1080 resolution
- Up to 60 frames per second
- Up to 384x Zoom
- Multiple simultaneous streams
- 360° x 180° endless rotation
- 5-Year camera warranty

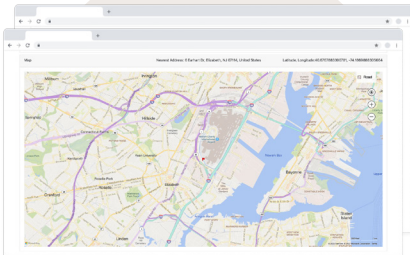

## Remote access management

### Access whenever and wherever

The Remote Signal Management System allows for live monitoring of signal operation, as well as the ability to remotely adjust signal timings over the internet. In the interest of safety, many Departments of Transportation require authorized personnel to be onsite to observe traffic when signal programs are changed. In light of today's complex work zone traffic control setups — and our commitment to providing the highest level of safety — Horizon Signal endorses this policy.

#### System capabilities

- Remote signal timing changes
- Remote error log access
- Remote start and stop of signal timing program
- Real-time detection input viewing
