

# Portable Pedestrian Crosswalk System

Improved safety for  
pedestrians in work  
zones.

## Temporary crosswalk control

Our Pedestrian Signal System includes MUTCD compliant indications exclusively intended for controlling pedestrian traffic. The signal indications consist of the illuminated symbols of a walking person (symbolizing "Walk") and an upraised hand (symbolizing "Don't Walk"). The time remaining to cross is also displayed as a real-time countdown which automatically programs itself during initial setup. ADA-compliant pedestrian systems are also available upon request.

The Pedestrian Signal System can be furnished as a standalone system on an SQ2 or SQ2T platform, and can also be integrated onto an SQ3TS trailer.

## At a Glance

Portable Pedestrian Crosswalk systems can be built on our compact SQ2 cart or our powerful SQ2T trailer platform for increased battery life and large solar array. Pedestrian indications can also be installed on our SQ3TS system for added flexibility in signal deployments.
