

Horizon Signal Plus

Smarter signal monitoring for modern traffic management

**HORIZON
SIGNAL PLUS**

Horizon Signal Plus gives agencies, contractors, and traffic professionals a smarter way to monitor and manage temporary traffic signal systems in real time.

Designed specifically for modern work zone operations, our software combines remote accessibility, live system visibility, and advanced monitoring tools into one connected interface built to support safer and more efficient traffic management.

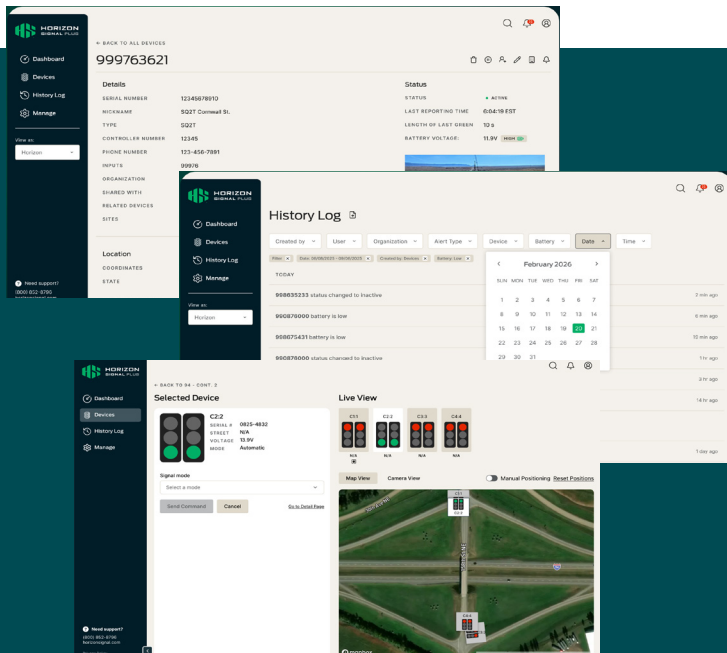

From instant notifications and signal status updates to remote programming and live activity monitoring, Horizon Signal Plus helps crews stay informed and respond quickly from virtually anywhere.

Whether managing a single project or coordinating multiple work zones across an entire region, Horizon Signal Plus delivers the flexibility and operational awareness needed to keep traffic moving and projects running smoothly.

Horizon Signal Plus Access Levels

Horizon Signal Plus allows you to view, manage, and control your signals from a single interactive dashboard. Choose from over a dozen data inputs - like battery voltage or device status - so the data that matters most is always within reach. Spot trends with history logs, and configure real-time alerts for individuals at any level of your organization. With three levels of access, Horizon Signal Plus adapts to your specific project needs.

FEATURES	TIER 1 Basic Monitoring	TIER 2 Advanced Monitoring	TIER 3 Comprehensive Monitoring
Secure web-based access	✓	✓	✓
Real-time notifications	✓	✓	✓
Signal status monitoring	✓	✓	✓
Live Activity view		✓	✓
